Hi Rachel,  
Would you please share this with our membership? Interesting and positive news from the Colorado Department of Public Health and Environment and San Juan Basin Health regarding fish tissue samples from the Animas River following the Gold King Event.  
Thanks!  
Ann

Good morning -

CDPHE and San Juan Basin Health issued a press release that trout in the Animas River are safe to eat. The release will be shared statewide shortly. In addition to the release, the fish tissue data and rationale for the decision will also be posted to the CDPHE Animas River spill page.

Files are attached here for your reference. Please allow 5 minutes or so for the webpage to update.

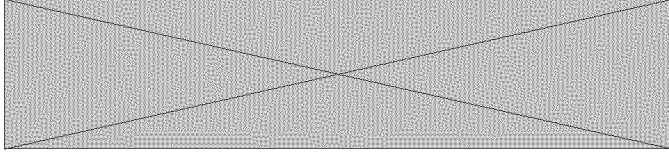

Thanks and let me know if you have any questions.
